

HEMO 10

Leading highpressure spray unit for sprayplaster

HEMO 10 is an airless highpressure spray unit designed for sprayapplications of plaster and heavy coatings.

The **HEMO 10** has been produced for more than 15 years and have established a solid reputation as the leading electric high-pressure unit for sprayplaster and other heavy duty materials.

Airless spraying gives considerable cleaner working environment with less noise and easy handling together with both technical and economical advantages:

- No need for compressor.
- Less dust and overspray.

- Precise application and texturing
- Low noise level
- Easy one hand maneuvered spraygun
- Less consumption of plaster
- Minimum masking and covering

The **HEMO 10** is used for application of sprayplaster, spack, concrete filler, PVA-glue, asphalt emulsions and other kinds of heavy duty material with grain size up to 0,7 mm that needs high capacity.

The fluid pump is a pistonpump with three pistons and easy replaceable sealings. The large fluidsection and the powerful motor gives a capacity of approx. 20 kg/min.

HEMO SPRAY UNITS

HEMO 10

Airless spray unit

Technical specification

Motor:	3 kW
Electr. req.:	380 V 3-phase AC 16 amp. (alt. 220 V 3-phase)
Pump:	hardened steel pistons
Length:	1300 mm
Height:	900 mm excl. bagemptier (1.030 mm with bagemptier)
Weight:	130 kg
Container:	75 liter
Hose:	1/2" standard, 5/8" option
Length of hose:	11 meter standard, maximum 18 meter for plaster and 36 meter for paint
Operating pressure:	110-160 kp/cm ² (110-160 bar)
Spray Gun:	Hemo 15700 "Jet Gun"
Spray Tips:	max. 0.085"
Capacity:	20 kg/min
Bagemptier:	detachable reinforced glassfibre incl. wringer

Accessories

15700	"Jet Gun" (high capacity)
10911	hose 1/2" 11 meter
15911	hose 5/8" 11 meter
15918	hose 5/8" 18 meter
10750	texture adapter for heavier texture (req. high pressure air: 400 l/m at 7 bar)
10850	tip holder
10812	spray tip up to 0,085"
10950	integrated tool box
10940	plastic cover for container
